Good Morning Elizabeth

...you would be partially correct. Airway Heights took it upon themselves to test a private well north of one of their water towers at (b) (6). The other private well was at (b) (6), and that one is just north of the base main gate. On that one the person followed sampling instruction seemingly well and took the sample from outside. I have been stressing that they use a certified sampler from the lab to ensure technique and establish a chain of custody. Samples take about 3 weeks and cost \$300, or \$400 if they use a cert. sampler. That individual will be retesting to include a neighbor so I will have a wait and see.
I don't have the results on the AH sample except to know it is above the HA. The other one came in at 520 ppt. I'm anticipating that some residents will become concerned as they start listening to the "grapevine"

Mike

Thanks Mike,

Would I be correct assuming those are results from individuals sampling their wells?

Elizabeth

Hey all

Just gleaned information from around the globe and thought I would share this with you...

Also, there have been a couple of well water test results trickling exceeding the HA that are outside the AF study area...will keep you posted. Also keep me posted on any developments regarding the Chemical Action Plan. Locally we are still waiting on AF Civil Engineering to see if they will perform additional sampling.

Hoping for the best

Mike
